TECHNOLOGY FOR HEALTH

EARLY DETECTION OF NIGHT BLINDNESS (MOSTLY DUE TO VIT A DEFICIENCY)

Why

Night blindness can significantly contribute to road accidents, particularly in low-light conditions such as at dusk, dawn, or during the night. Night blindness, also known as nyctalopia, is a condition where an individual has difficulty seeing in low-light conditions. This can be caused by various factors including vitamin A deficiency, genetic conditions, certain medications, or eye diseases such as retinitis pigmentosa.

What do we can need?

- ✓ Vit A Detection using a “EmTech A Meter”
- ✓ Provide a right dose of vitamin A
- ✓ Diet and Lifestyle guidance

Join Us in Creating an Impaact!

Per test Rs 200/-

It includes Free Vit A if deficiency

Free retest if deficiency

Free Nutrition software worth Rs 800.

Rent for 1 day: Rs 3000

Rent for 1 month: Rs 15000

Rent for 1 year: Rs 1 lac
